

We are excited to announce the opening of our Cleveland, Ohio office. The facility is located downtown in the Fifth Third Center and allows us to better service new and existing clients in northeast Ohio.

PANDEY provides environmental investigation, assessment and remediation services which allow for the redevelopment, or continued productive use, of contaminated property. Founded in 2002, we are a solutions oriented company dedicated to performing outstanding services and overcoming obstacles. Effective dialogue with both clients and regulators, coupled with a thorough understanding of regulatory guidelines, risk assessment techniques, and remedial options, enables us to routinely complete projects that previously sat stagnant for years.

We hold the distinction of successfully issuing fifteen (15) "No Further Action" letters through the Ohio EPA Voluntary Action program. We were first to place a landfill in Ohio's VAP, and successfully completed the only VAP project contaminated with toxic and flammable gases (methane and hydrogen sulfide). We also obtained a VAP Urban Setting Designation for the entire City of Cleveland. These projects have garnered praise from Ohio's Governor, the Ohio EPA, and the Ohio Department of Development for their public/private collaboration and protection of citizens.

In addition to our accomplishments in Ohio's VAP, we have secured approximately \$25 million dollars for our clients through Clean Ohio Fund (CORF and COAF), Industrial Site Improvement Fund (ISIF), Job Ready Site (JRS) Discretionary Fund and US EPA Brownfield Assessment grants.
